DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Brehm et al., US No. 5,615,860 ("Brehm").

In short, Brehm discloses a bushing (20) comprising a bushing wall defining an interior of the bushing (FIG. 1).

The bushing wall has an opening (30) allowing passage of a hydraulic medium to and from the interior (FIG. 1). The opening has an opening wall that at least across a portion of a circumference of the opening wall is formed as a molded bevel (see taper of 30).

The molded bevel (FIG. 1) is positioned at an acute angle to a radial plane of the bushing wall (40).

The acute angle opens radially inward (i.e., it is slightly tapered).

The bushing walls have outer annular channels, with the openings pen into the outer annular channels.

The acute angle opens radially inward.
